## Personal Statement

I have gained a wide range of experience at large and smaller studios and I am passionate about producing the best possible outcomes. I am an accurate and careful worker, with a keen eye for detail. Over my career, I have been given many exciting opportunities and have gained a wealth of experience and transferable skills.

Currently, I am a Senior Technical Artist at Edge Case Games / Wargaming in Guildford.

Prior to my current role, I have worked on AAA games when employed at Microsoft at Lionhead Studios, Rare and Frontier Developments in Environment and Technical Artist roles.

Between Lionhead Studios and joining Edgecase Games I wanted to expand my knowledge and experience in different areas of the industry and worked on various projects from VR to adverts to feature films for large companies such as Disney and Framestore.

I learnt many new pipelines and ways of working but still worked daily within Unreal Engine 4 and Maya, and so developed my relevant game industry experience.

During the past 3 years I've worked in one on one situations and presented my work to many influential and talented visionaries such Phil Spencer, Sir Kenneth Branagh and Elaina Ford.

My passion lies within the creative industry and I thoroughly enjoy exploring and experiencing a variety of different games, films and gallery visits in my free time.

I would like to think I get on with people at all levels, easily making good working relationships and enjoying spending time with work colleagues and spending time developing these friendships.

During my Masters I became the student representative, which allowed me to provide my fellow students with a voice and share their views and opinions to the Masters Council.

I am a highly motivated, strong team player with interest in a variety of sports including Hockey, Golf and Badminton.

I was also the Club Secretary for the University hockey club for two years, which involved organising transportation, tournaments, and events. This responsibility helped me develop my leadership, communication and time management skills.

I seek out new responsibilities and challenges, irrespective of reward and recognition, and I decided to take up the role of coach for children ages 5-15 at the Cottenham Roller Hockey Club and helped within the National team setup. I thoroughly enjoyed supporting others and working with youngsters and therefore took on the role of mentoring children for the Beat Bullying Charity; this was such an incredible experience, one which I will never forget.

I also help manage the Indie Game Developers group on Facebook which has over 100,000 members. In these leadership roles I have had to manage and inspire people, organise events and be responsible for money and safety.

I love to push myself and am always keen to learn and improve my skills by completing courses and tutorials in my spare time.
